**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, drawn to a method of “patterning a substrate with a substantially arbitrary arrangement,” classified in class 430, subclass 5.
  - II. Claims 10-15, drawn to a device with “a substantially arbitrary arrangement of features,” classified in class 365, subclass 129.
  - III. Claims 16-17, drawn to a system consisting of a data processor and an SRAM, classified in class 365, subclass 230.01.
  - IV. Claims 18-22, drawn to a method of illuminating a substrate with an interference pattern, classified in class 430, subclass 311.
  - V. Claims 23-30, drawn to a method of patterning a substrate, classified in class 430, subclass 394.
  - VI. Claims 31-32, drawn to an apparatus with an interference exposure module, classified in class 355, subclass 67.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I - VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are a (1) a method of patterning a substrate with a substantially arbitrary arrangement, (2) a device with a substantially arbitrary arrangement of features, (3) a data processor and an

SRAM, (4) a method of illuminating a substrate with an interference pattern, (5) a method of patterning a substrate and (5) an apparatus with an interference exposure module.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for any one Group (I-VI) is not required for any other Group (I-VI), restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney E Fuller whose telephone number is 571-272-2118. The examiner can normally be reached on 8:00am - 4:30pm.
